G-VAC

Body Shaping & Rejuvenation

Wellness Beyond Gravity

Step into a groundbreaking Wellness technology that dramatically improves the way Lymphatic drainage treatments have been conducted in the past. G-Vac merges NASA's pioneering tech with evidence-based wellness to unleash a new dimension of beauty, recovery and wellbeing. All treatment programs harness the conditions to support the body's natural ability to restore balance.

Designed for holistic rejuvenation, G-Vac unlocks a multitude of benefits by boosting lymphatic flow and optimizing blood circulation. Beyond the visible reduction in the appearance of cellulite and spider veins, it aids in post-exercise recovery and alleviates leg and foot discomfort, swelling and fatigue – revealing a contour that looks and feels refreshed and radiant.

Technology pioneered by **NASA**

With a substantial body of scientific and clinical evidence supporting the benefits of Intermittent Vacuum Therapy, G-Vac serves as a gateway to transformative wellbeing. The technology behind G-Vac's foundation is employed by NASA in manned space travel, to maintain astronauts' lower body blood circulation in the absence of gravity.

Intermittent Vacuum Therapy (IVT) or Negative Pressure Body Therapy (NPBT) utilizes a controlled suction and pushing action to gently lift, compress and decompress the lower body in the G-Vac chamber. This alternating cycle stimulates blood flow and promotes lymphatic drainage, while simultaneously reducing muscle tension in a non-invasive way.

Cellulite under Pressure

Cellulite occurs when fat deposits push through the connective tissue beneath the skin. The fat cells store toxins and metabolic waste products, which can only be removed through the lymphatic system. Because the lymphatic system has no pump- like the heart in the cardiovascular system, flow of the lymphatic fluid is reliant predominantly on skeletal muscle action. This action is impaired when the connective tissue, found under the surface of the skin, is weak - even with exercise.

Early testing has verified the effectiveness of negative pressure treatment against cellulite.

Real Stories, real Results:

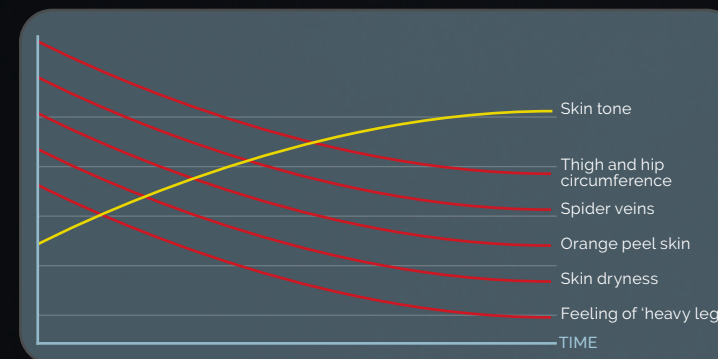

Beauty beyond the Surface

G-Vac provides an opportunity to experience a new level of self-confidence, with the reduced appearance of cellulite, toned hips and thighs, and smooth, revitalized skin. It unveils the beauty from within, in a relaxing and touchless way.

The results speak for themselves.

- Significant reduction in thigh and hip circumference
- Reduction of spider veins
- Reduction of orange peel skin
- Reduction of skin dryness
- Improvement in skin tone
- Reduction in the feeling of 'heavy legs'

Recovery

Travel enthusiasts and frequent flyers, professionals with sedentary jobs such as office workers, can all benefit from G-Vac's enhancement of blood and lymphatic circulation, helping reduce the risks associated with prolonged inactivity. In the elderly population, issues related to blood circulation and lymphatic flow become prominent.

G-Vac can also serve as a remedial treatment to support these individuals. For athletes or active individuals, G-Vac offers a unique advantage in aiding muscle recovery, paving the way for improved recuperation after intensive activity.

Optimized Wellness

Beyond the physical, G-Vac embodies the essence of wellness, fostering enhanced vitality and energy. Regardless of lifestyle or profession, users can expect to experience a harmonious blend of improved physical wellness.

G-Vac treatments can be customized with targeted treatment programs and adjustable pressure settings. All programs have 'Basic' and 'Advanced' Options.

Treatment Programs

1. Figure Training

Combines lymphatic drainage, detoxification, skin firming and tightening, reducing the appearance of cellulite and spider veins.

2. Regeneration & Performance

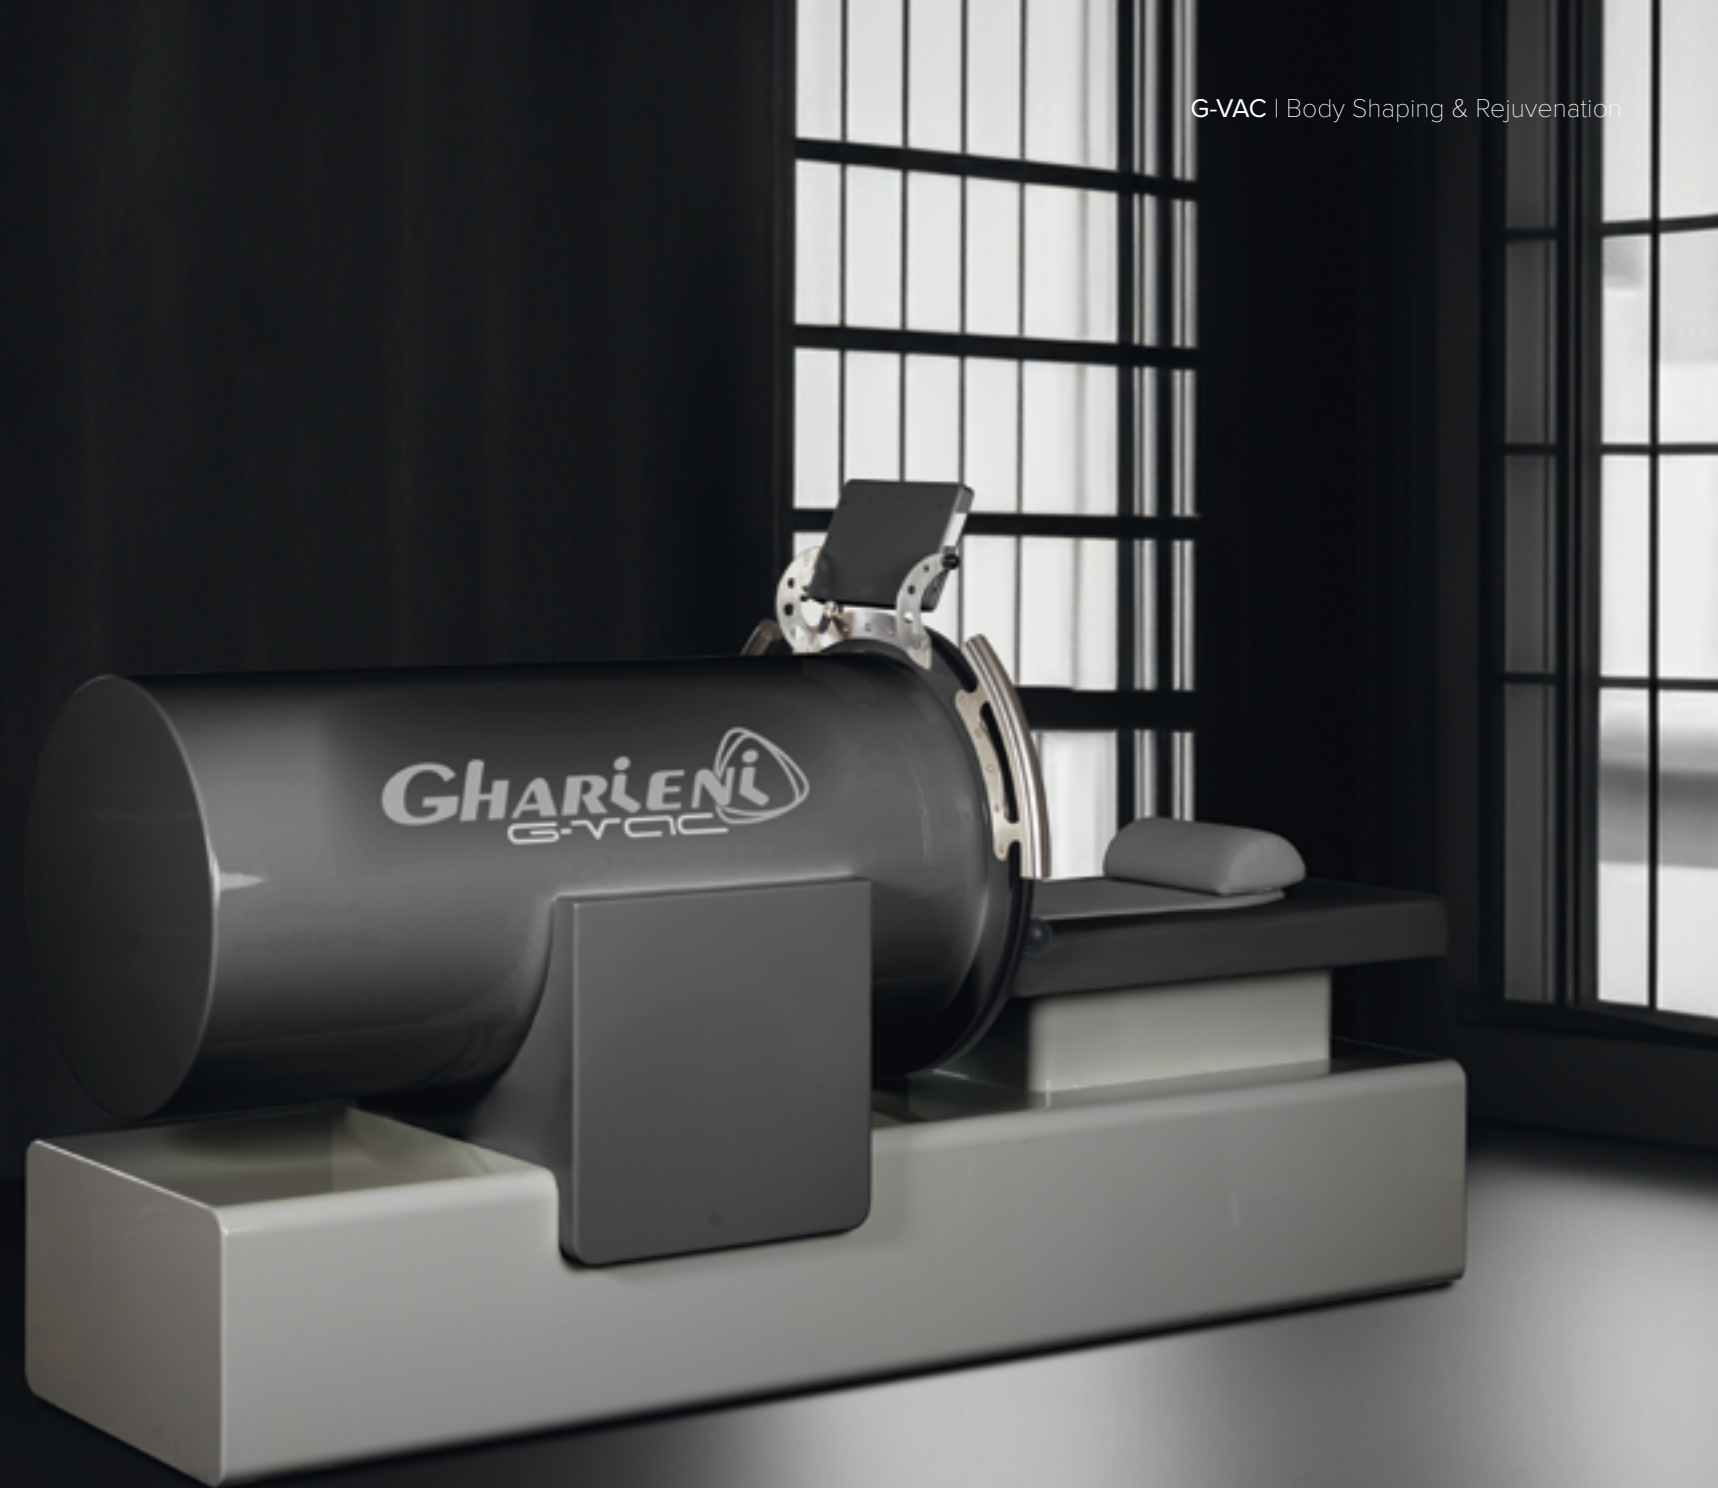

A great option for athletes after intensive sporting activities to aid with recovery, as maintenance to support the prevention of musculo-skeletal related injuries, and aid in optimized performance.

3. Health & Vascular Training

Passive exercise for the vascular system to boost circulation in the lower body, alleviate swelling and provide relief for 'heavy', sore legs and feet.

4. Wellness & Vitality

Lymphatic drainage, combined with the benefits of nitric-oxide (NO) release and improved circulation for increased levels of vitality and wellbeing.

“*You’re accelerating the lymphatic drainage system...that is getting all the toxins out of your body and at the same time it is accelerating the uptake of nutrients and oxygen into your body to speed up recovery!*”

John Graham Harper-Athlete, CEO and Founder

Red Light Module

Can be added to any program to enhance the treatment benefits.

Red and near-infrared harnesses the power of specific wavelengths of light to stimulate the skin's natural healing and rejuvenation processes. This non-invasive treatment offers a multitude of benefits, including the enhancement of collagen and elastin production, which are vital proteins for maintaining skin elasticity and firmness. Additionally, it aids in reducing inflammation, accelerating wound healing, and enhancing skin health and appearance.

Pricing & Details

Specifications

STANDARD MODEL

TECHNICAL SPECIFICATIONS:

Length of the base: 220 cm (86.6 in)

Width: 120 cm (47.2 in)

Height: 140 cm (55.1 in)

Load capacity: 180 kg (397 lbs)

Total weight of bed: 140 kg (309 lbs)

FEATURES:

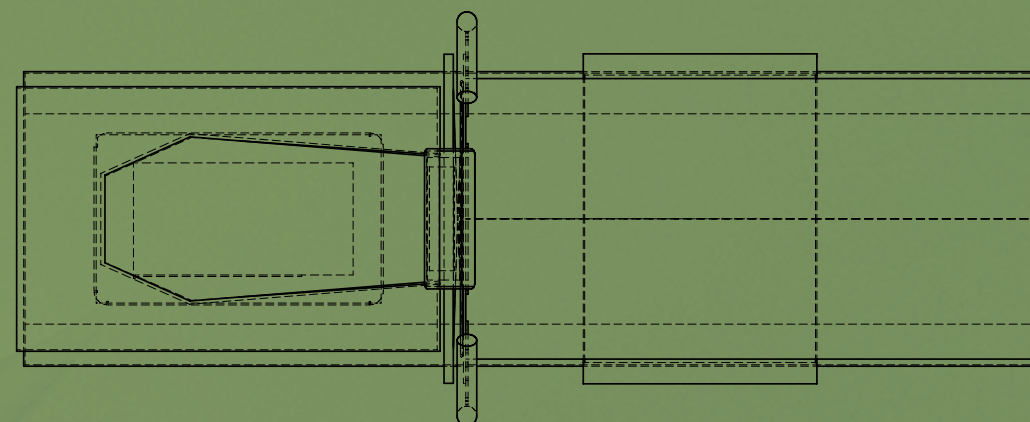

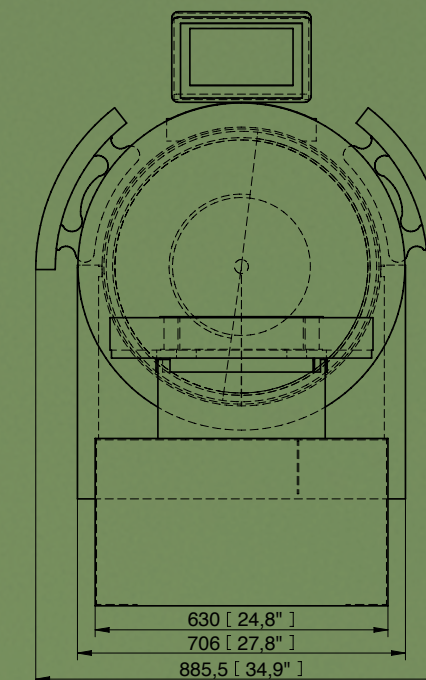

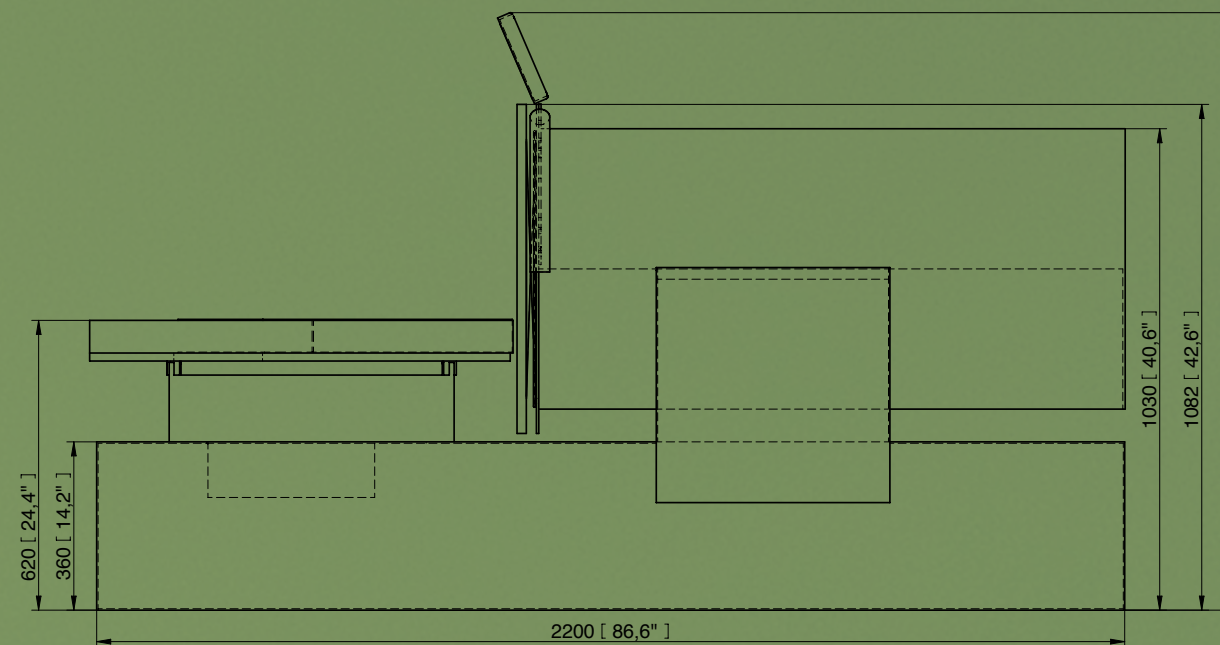

Electrically adjustable backrest

Touch Screen can be equipped with additional card reader

Certified quality according to ISO/EN

TÜV-tested, with CE-marking

Technical Design & Dimensions

Designed, engineered and
manufactured in Germany
